LLM - Large Language Models

A LLM is an model trained on a lot of data like text, images and can understand, generate and respond to insani bhasha..

Coal based Thermal Power Plant

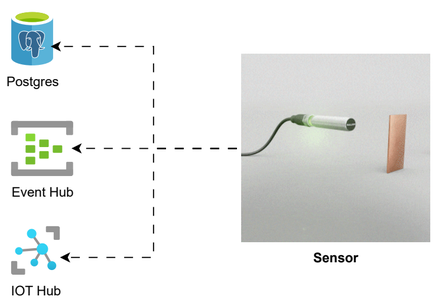

Components of Thermal Power Plant

1. Boiler
2. Turbine
3. Coal handling System
4. Water Cooling System
5. Generator
6. Steam Pipes

Dimag ke sawal

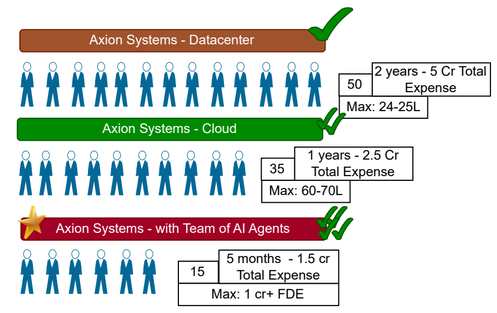

- Ye plant kitna electricity generate kar raha hai?
- Boiler and Turbine ki current condition kya hai?
- Coal Consumption kitna hai?
- Per Unit Electricity Charges?
- Koi component overheat to nahi ho raha hai?
- Plant outage hone pr kitna loss hoga?
- Monthly Report, Weekly Report etc..

Ye Powerplant dashboard application 3 Tier Architecture ke form me banaya gya hai jisme frontend Next JS hai, Backend Python hai and DB postgres hai..

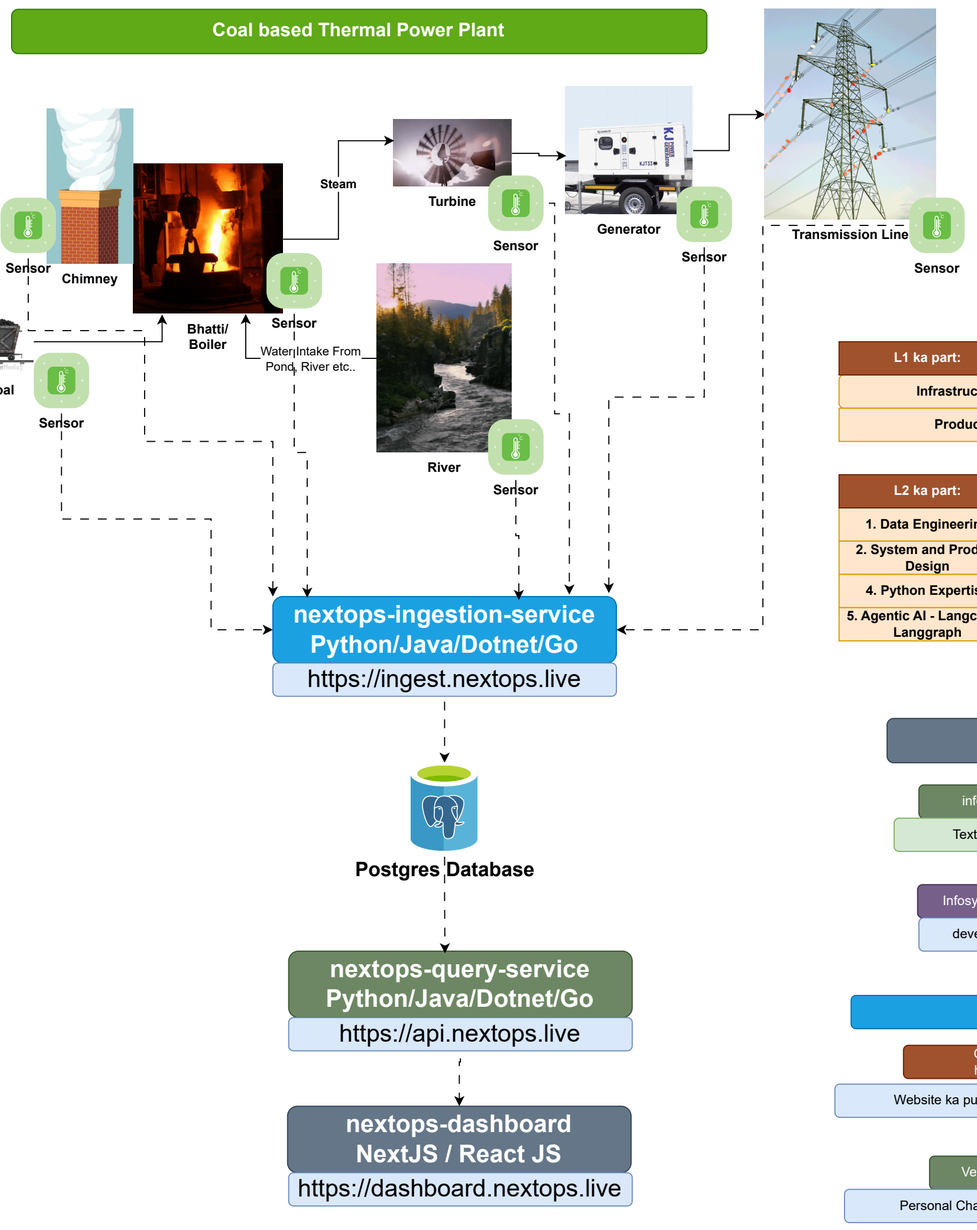

Ab is application ko banana hai

1. Client asal me chahta kya hai? - **Business Requirements**
2. Client ki requirement ke document ko bolte hai **Business Requirement Document (BRD)**
3. **Requirements:**
   BR01 - Live Plant Monitoring
   BR02 - Generation Efficiency
   BR03 - Abnormal Sensor Alert
   BR04 - Financial Visibility
   BR05 - Reporting and Audit
4. Purchase Order (PO)
5. Detailed Functional Requirement start by **Product Owner.**
   Function Requirement Document (FRD)
   FRD01, FRD02, FRD03, FRD04
6. **HLD of Application**
   - **6.1. Data Modeling and Data Design**

Product and System Design

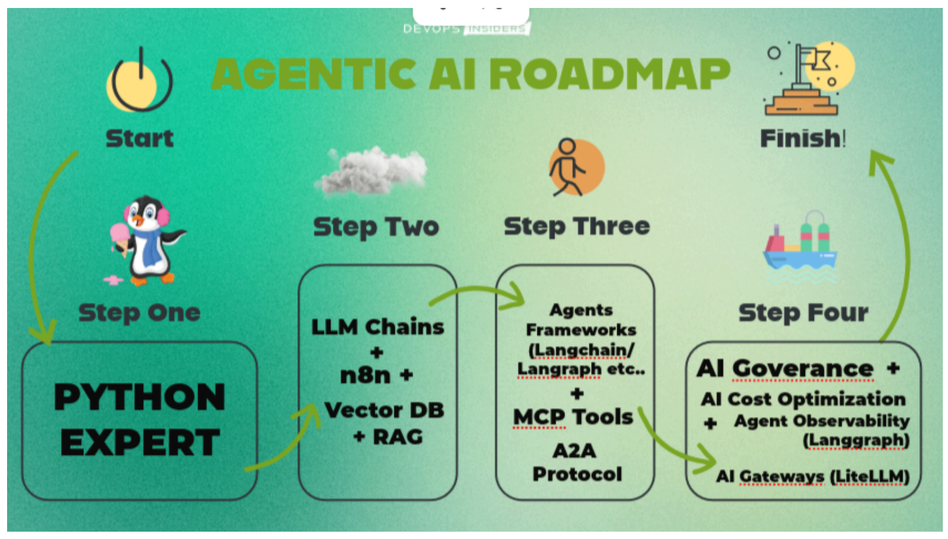

L1 ka part:

- Infrastructure Deployment — AI
- Product Deployment — AI

L2 ka part:

- 1. Data Engineering ✓
- 2. System and Product Design ✓
- 4. Python Expertise ✓
- 5. Agentic AI - Langchain/ Langgraph ✓
